ByteStreams Brand Kit

Smarter Workflows, Stronger Results

Version 1.0 — April 2026

Confidential — For Internal and Approved Partner Use

1. Brand Identity

ByteStreams is a SaaS platform purpose-built for professional services teams seeking smarter, AI-powered workflow automation. Every element of the brand conveys technical authority, forward momentum, and genuine approachability.

Attribute	Details
Company Name	ByteStreams
Tagline	Smarter Workflows, Stronger Results
Brand Voice	Technical, energetic, honest, approachable
Target Audience	Enterprise teams, professional services firms, and developers adopting AI-powered workflow automation

Brand Personality

Trait	Description
Innovative	Leading-edge AI and data engineering — always pushing boundaries while remaining practical
Reliable	Production-grade, scalable infrastructure that teams trust with their most critical workflows
Clear	Complexity made accessible — we demystify, never overcomplicate
Energetic	Forward-moving momentum — every interaction should feel purposeful and dynamic

---

2. Color System

The ByteStreams color system is designed for clarity, accessibility, and consistency across light and dark interfaces. Each color has a defined role — never use colors outside their intended purpose.

2.1 Primary Palette

Role	Name	Hex	RGB	Swatch	Usage
Primary	**Stream Blue**	`#2563EB`	37, 99, 235		CTAs, links, primary actions
Primary Light	**Flow Blue**	`#3B82F6`	59, 130, 246		Hover states, highlights
Primary Dark	**Deep Stream**	`#1D4ED8`	29, 78, 216		Active states, emphasis
Secondary	**Data Teal**	`#06B6D4`	6, 182, 212		Secondary actions, data viz
Accent	**Signal Green**	`#10B981`	16, 185, 129		Success, growth indicators
Accent Warm	**Byte Amber**	`#F59E0B`	245, 158, 11		Warnings, attention highlights

2.2 Dark Mode Palette (Default)

Role	Name	Hex	Swatch	Usage
Background	**Void**	`#0D1117`		Primary background
Surface	**Carbon**	`#161B22`		Cards, panels, modals
Elevated	**Slate**	`#21262D`		Elevated

Role	Name	Hex	Swatch	Usage
				containers, navbars
Border	**Edge**	`#30363D`		Borders, dividers
Text Primary	**Bright**	`#F0F6FC`		Headings, primary content
Text Secondary	**Muted**	`#8B949E`		Descriptions, labels
Text Tertiary	**Faded**	`#484F58`		Placeholders, disabled

2.3 Light Mode Palette (Alternate)

Role	Name	Hex	Swatch	Usage
Background	**Cloud**	`#FFFFFF`		Primary background
Surface	**Mist**	`#F6F8FA`		Cards, panels
Elevated	**Fog**	`#EAEEF2`		Elevated containers
Border	**Trace**	`#D0D7DE`		Borders, dividers
Text Primary	**Ink**	`#1F2328`		Headings, primary content
Text Secondary	**Graphite**	`#656D76`		Descriptions, labels
Text Tertiary	**Ash**	`#8C959F`		Placeholders, disabled

2.4 Semantic Colors

Role	Hex	Swatch	Usage
Success	`#10B981`		Confirmations, positive state
Warning	`#F59E0B`		Caution states
Error	`#EF4444`		Errors, destructive actions
Info	`#3B82F6`		Informational callouts

---

3. Typography

Typography establishes hierarchy, readability, and brand consistency. Inter is the primary typeface for its clarity at all sizes; JetBrains Mono serves code and technical contexts.

3.1 Font Stack

Role	Font Family	Weight	Fallback
Display	Inter	700 Bold	-apple-system, Segoe UI, sans-serif
Heading	Inter	600 Semi	-apple-system, Segoe UI, sans-serif
Body	Inter	400 Regular	-apple-system, Segoe UI, sans-serif
Code	JetBrains Mono	400 Regular	Fira Code, Consolas, monospace
UI Labels	Inter	500 Medium	-apple-system, Segoe UI, sans-serif

3.2 Type Scale

Based on a 16px root size. All proportions maintain vertical rhythm and comfortable reading density.

Level	Size	Line Height	Letter Spacing	Usage
H1	2.5rem (40px)	1.2	-0.025em	Page titles
H2	2rem (32px)	1.25	-0.02em	Section headers
H3	1.5rem (24px)	1.3	-0.015em	Subsections
H4	1.25rem (20px)	1.4	-0.01em	Card headers
Body	1rem (16px)	1.6	0	Paragraph text
Small	0.875rem (14px)	1.5	0.01em	Captions, labels
Tiny	0.75rem (12px)	1.5	0.02em	Metadata, badges

Tip

Always use the specified letter-spacing values. Tight tracking on headings creates a polished, editorial feel, while neutral tracking on body text maximizes readability.

---

4. Spacing and Layout

A consistent spacing system based on a 4px unit ensures predictable rhythm and alignment across every component and page layout.

4.1 Spacing Scale

Token	Value	Usage
xs	4px	Inline icon gaps
sm	8px	Tight element spacing
md	16px	Default component padding
lg	24px	Section gaps
xl	32px	Card padding
2xl	48px	Section padding
3xl	64px	Page section breaks

4.2 Border Radius

Token	Value	Usage
sm	4px	Badges, tags
md	8px	Buttons, inputs
lg	12px	Cards, panels
xl	16px	Modals, sheets
full	9999px	Avatars, pills

---

5. Logo Usage Guidelines

The ByteStreams logo is the most visible expression of the brand. Consistent, careful usage preserves brand equity and recognition across every touchpoint.

5.1 Clear Space and Minimum Size

Rule	Specification
Clear Space	Minimum clear space on all sides equals the height of the capital “B” in the wordmark
Minimum Size — Digital	120px wide
Minimum Size — Print	1 inch / 25mm wide

5.2 Approved Variants

Variant	Description	Use Case
Primary	Full-color logo on dark backgrounds	Default for dark UI, presentations, hero sections
Reversed	Full-color logo on light backgrounds	Light UI, print collateral, documents
Icon Only	“B” mark, minimum 32px	Favicons, app icons, avatars, compact layouts
Monochrome	Single-color version (black or white)	Single-color print, watermarks, embossing

5.3 Logo Don’ts

Logo Misuse — Avoid These

- **Do not** stretch, rotate, or skew the logo
- **Do not** place the logo on busy or low-contrast backgrounds
- **Do not** alter colors outside the approved palette
- **Do not** add drop shadows, outlines, or effects
- **Do not** violate the minimum clear-space requirements
- **Do not** rearrange or separate the icon from the wordmark

6. Iconography

Icons reinforce navigation, status, and action across the ByteStreams interface. A unified icon style ensures visual coherence at every scale.

Property	Specification
Style	Outlined, 1.5px stroke weight
Caps and Joins	Rounded
Grid	24 × 24px with 2px padding (20px live area)
Corner Radius	2px on geometric shapes
Recommended Source	Lucide Icons — or custom icons drawn in the same outlined style

Tip

When creating custom icons, always start from the 24px grid template. Align strokes to full or half pixels to prevent blurring at standard display density.

7. Imagery and Illustration Guidelines

Visual assets should reinforce ByteStreams' identity as a modern, data-centric platform. Every image should feel intentional, technical, and on-brand.

7.1 Visual Direction

- **Prefer abstract data-flow visuals** — node graphs, pipeline diagrams, and network topologies
- **Dark-mode-first compositions** — design hero imagery and illustrations for dark backgrounds, then adapt for light mode
- **Accent with brand gradients** — use Stream Blue (`#2563EB`) to Data Teal (`#06B6D4`) at a 135° direction
- **Avoid generic stock photography** — prefer custom illustrations, data visualizations, and abstract renders

7.2 Style Checklist

Guideline	Status
Uses brand color palette	Required
Dark-mode-first composition	Required
Abstract / data-driven subject matter	Strongly preferred
135° gradient direction	Required for gradient overlays
No stock photography clichés	Required
High resolution (≥2x for Retina)	Required for digital

---

8. Motion and Interaction

Motion should feel purposeful and responsive. Every animation guides the user's attention without causing distraction. Use the following standardized durations and easing curves.

Property	Duration	Easing	Usage
Micro	150ms	`ease-out`	Hover states,

Property	Duration	Easing	Usage
			focus rings, toggles
Standard	250ms	`cubic-bezier(.4, 0, .2, 1)`	Transitions, reveals, dropdowns
Emphasis	400ms	`cubic-bezier(.4, 0, .2, 1)`	Page transitions, modals, drawers
Data	600ms	`cubic-bezier(.4, 0, .2, 1)`	Chart animations, data loading sequences

Accessibility Note

Always respect the user's `prefers-reduced-motion` system setting. When reduced motion is preferred, replace all transitions with instant state changes (0ms duration).
